

# Introductory charts

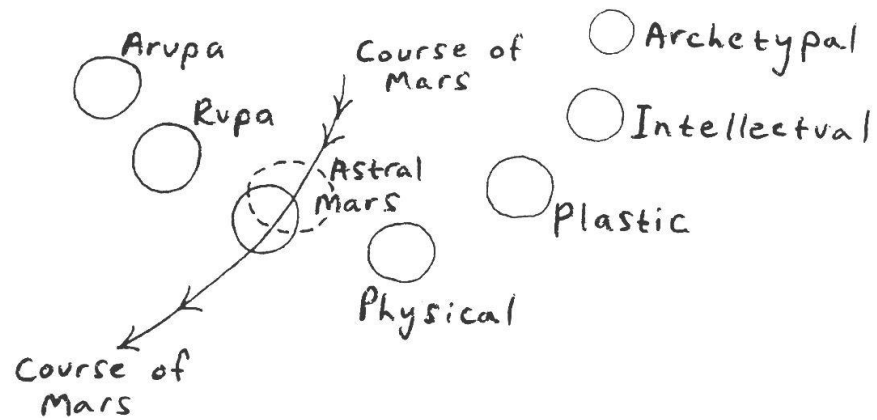

# Planetary Chain

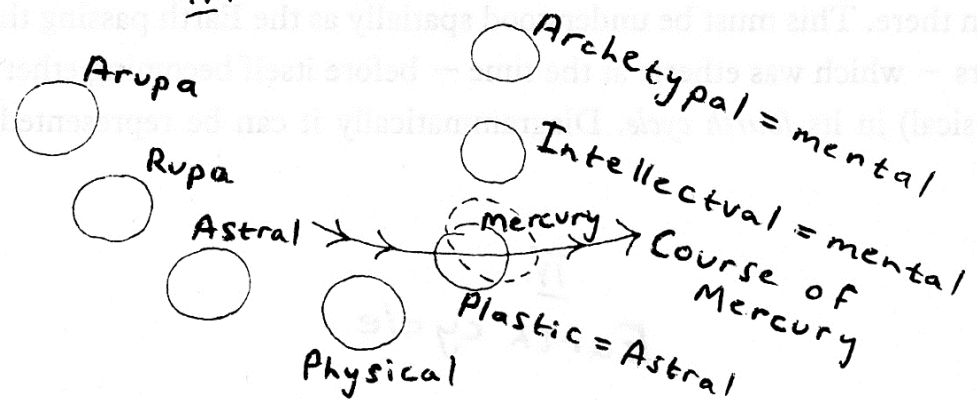

Consisting of seven Conditions of Life, then seven Conditions of Form, and Seven Conditions of Consciousness, for a total of 343 evolutionary states. They are separated by small and large state transitions called pralayas. The states transitions are transformed by spirits called prajapatis, in total  $10+6+5 = 21$  in total. The planet Earth is the fourth CoC currently in the fourth CoL (mineral realm) and fourth CoF (physical). Within this physical mineral state, we can distinguish seven epochs, we are in the fourth PostAtlantean or Arian.
