before Stalinist GULAG

after GULAG

Preface:

1. I personally stumbled upon Nikolai A. Kozyrev (1908-1983) as early as in Ostrander/Schroeder (1976)¹ in the 1980ties, but at that time equipped with the old school mathematics and old school physics the significance of Kozyrev nearly escaped me, partly because of the somewhat bewildering categorization under keyword “parapsychology”/PSI. I however met Kozyrev again in Farrell (2009)² – and this time in OTHER CONTEXTS of

¹ See and compare Ostrander, Sheila/Schroeder, Lynn; PSI. Die wissenschaftliche Erforschung und praktische Nutzung übersinnlicher Kräfte des Geistes und der Seele im Ostblock, Bern, München, Wien: Scherz 1972; amerik. u.d.T.: Psychic Discoveries behind the Iron Curtain, London; Abacus / Little, Brown 1976, new ed.(look up chapter „time“ ...); hier zitiert nach Lizenzausgabe für Gütersloh: Bertelsmann, Mohn s.a., S.164-172

² See and compare - Farrell, Joseph P.: The Philosophers` Stone, Port Townsend WA: Feral House 2009; keyword “Nikolai Kozyrev” in chapters: 7. Time is not a Skalar”, p. 151ff; darin Stichwort “Niikolai Kozyrev” in Kapitel: 8. Of Gyroscopes, , Sponges , and Hydrogen bombs: Kozyrev`s experiments and Wilcock`s Analogies, p. 171ff

considerably UPDATED physics and mathematics of the POST-Einstein-Era.

- Open brackets: During work on this list it reappeared to my eye a short notice on Kozyrev in Farrell (2008), NAZI International³. Close brackets! -

Nevertheless it might occur, that to the general public of so-called “well informed” intelligentsias whatever, especially in so-called West-European contaminated surroundings, the name Kozyrev, Nikolai may be a surprise, the cause of which partly may be, that since Soviet times it seems, that the work of this Ukrainian rooted researcher was HOLD BACK from public view by the State authorities, which very well were aware of its significance especially in the context of the so-called “space-race”, especially under aspects of the SDI-programs of US-President Ronald Reagan. Perhaps now the one or other reader may outcry, that this at first glance looks TYPICAL for the “evil minded” Russians of Communist times. The more considerate reader, experienced in the WORKING CONDITIONS in today LABORATORIES elsewhere in the “glorious West” may but object to this impression, that it even in the “FREE WEST” is a QUITE NORMAL ROUTINE, that research engineers have to AGREE and PARDON WITHOUT QUESTIONING to CONTRACT-CONDITIONS, that the employer may CONTRADICT ANY PUBLICATION of research work, on the simple ASSUMPTION that it MIGHT be “sensible”, which simply means, that STATE, BUSINESS and MILITARY think, that they “one day or other” MIGHT PROFIT from such research.

Well, among my contacts I do not know ANYBODY of engineers, who REJECTED the mentioned “fair deals”, which is nice living and interesting work-life bought with some “Gentlemen agreements”, which may be quite okay, especially because not everybody is a born hero of fighter!

Mentioning such specifics of quite normal working conditions of any research engineer in the “glorious West” may not be misinterpreted in that way, that I intended to present an argument for an academic discussion around the topic of “nice behavior dictatorship”. No, my intention is, to present to the reader in the “free West” some STRONG CONTRASTS if compared with the BIOGRAPHICAL SITUATION of Nicolai Kozyrev, who started his life in TSARIST times – where, by the way, as late Otto of Habsburg once put it, UKRAINE was a PROSPERING region with for instance EXPORTS in grain and cereals, not to speak of the SUCCESS of the HEAVY INDUSTRY complex of “Donbas” with COAL and STEEL! -, after that had to suffer from poor circumstances of life after the so-called “proletarian revolution” of the Communist-Socialist Bolshewiki, until in STALINIST TIMES he fell victim to, what later by Alexander Solzhenitsyn was called “Archipel GULAG”, the “system of concentration camps for forced labor”, before he after the changings under Khrushchev could enter a more regular scientific career, but of course within the restrictions and frictions of the Russian system in place at that time.

We may not forget in the TODAY mentality of “happy pancakes everywhere”, what MARTYRDOM the “true researcher” on THIS PLANET in OUR TIMES in cases may have to face!

---xxx---

3 Compare Farrell, Joseph P.: NAZI International. The Nazis` Postwar Plan to Control Finance, Conflict, Physics and Space, Kempton / Illinois, USA: Adventures Unlimited 2008, chapter 10,C,4 “Fusion, Torsion and Stars: The Work of Dr. Nikolai Kozyrev”, p. 333-335

2. If we find in source Ostrander/Schroeder (1976) a smell of “parapsychology” and in Farrell (2009) of “alchemy” this would not exhaust the possibilities for extravagant if not strange approaches towards Nikolay Kozyrev, who has kept the wild imaginations of rather unenlightened folks if not evildoers, which latter after his death approximately in 1990 introduced a „Kozyrev mirror“⁴, which had no PHYSICAL- nor any other „real“ - meaning at all, but was from beginning to end conceptualized as FRAUD and HOAX, which were subject to court trials in which was ruled, that some people with questionable „academical background“- among which a certain Hartmut Müller⁵ (former GDR/DDR), who had his Ph.D. from a Moscow „title forge“ (or “doctor-mill”)- found themselves suddenly sentenced, but NOT hindering OTHERS to continue with this NONSENSE of said „Kozyrev mirrors“, even until today.

Confronted with such “questionable accidentals” we may STRESS indeed therefor the point, that Nikolai Kozyrev in his own estimation was an EXPERIMENTAL PHYSICIST strictly inclined to MEASUREMENTS and CALCULATIONS and proper LABORATORY EQUIPMENT with SPECIAL APPARATUS, among which special GYROSCOPES and others newly developed equipment of some sophistication. We may concede however, that the research of Nikolai Kozyrev is MULTI-LAYERED, which may prevent “unilateral” mentalities to grasp the true importance of his work more fully! So the question is, what might be the REAL significance of the contributions of Nikolai Kozyrev?

---xxx---

3. The FIRST importance of Nikolai Kozyrev is, that he AMPLIFIED the understandings of the BASIC LAW or PRINCIPLE of CAUSE-EFFECT-RELATION or CAUSALITY in CHANGING the concept of SPACETIME as since Isaak Newton at the end of the 17th century appeared in some „deterministic fashion“, until the Einstein-Lorentz-Poincare principle of RELATIVITY and the Heisenberg „uncertainty principle“ became sort of „unquestionable“ fundamentals of modern physics, to which the Kozyrev amplification of „time-density“ was only one of the more recent factors to indicate, that physics since decennia has moved beyond Einstein – as was the case with mathematics.

It is of course not the task of this short sketch to remind the audience, that this would be a marvelous opportunity to have a short look in any academical philosophical encyclopedia on the keyword „causality“ and to have a little update on its development from antique Greek times to more recent contributions at the start of today formal logics at the end of 19th and the beginning of the 20th century, especially in the „Vienna School“ with

4 See [Kozyrev-mirror] Kozyrev Spiegel , pseudo-science, hoax, fraud, URL <http://esowatch.com/ge/index.php?title=Kozyrev-spiegel>

5 „Hartmut Müller“ in platforms like wikipedia, psiram or rational-wiki especially in context with „global scaling“, which latter is not in itself a „fraudulent“ keyword, but has scientific meaning in context of „unified theories“ and „theories for everything“ (TOE` s), but on the other hand until today is subject to pseudo-science. – It is a constant source of amusement for me, that Farrell, Joseph P.: Babylon Banksters. The Alchemy of Deep Physics, High Finance and Ancient Religion: Port Townsend/WA: Feral House 2010 – eISBN 978-1-932-59585 – chapter (I) Three A: Dr. Hartmut Müller and Global Scaling theory, my added pagination p.37-38 is taking Dr. Hartmut Müller SERIOUSLY, who – according to my informations from internet – is a convicted evildoer!

Waismann, Mach, Carnap and others, not to speak of Wittgenstein.

However it may be accentuated, that sometimes noble prizes were assigned for less, than what Kozyrev did, Noble Prizes however being something, that due to the poor conditions in Communist Russia and its “Archipel GULAG”, as Alexander Solshenizyn named the Soviet system of forced labor camps, of which Kozyrev survived after 11 long years of imprisonment, never were in reach of Kozyrev and other excellent Russian folks engaged in fundamental research for the long haul.

And WHAT EXACTLY was this STUNNING Kozyrev-amplification to conventional time-concepts? Well Kozyrev has MEASURED something, that TIME has a DENSITY, a GREATER density around a „CAUSE“ and LESSER density around an „effect“, that TIME is NOT INVARIANT against SPIN-ORIENTATION in revolving systems, which he even was able to correlate – BY MEASUREMENT AND CALCULATION - to the „density of summer“ and the „absence of density in winter“. The point here is, that nobody so far would have expected, that we in a CERTAIN (and DEFINED) SENSE have „other physics“ in summer or in winter at all!

To complicate the new concept of “time-density”, there popped up indications, that there might be a link between time and GRAVITY, the latter known in any filiation of Einstein-type physics as startpoint for endless seeming complications, if not one would prefer the view, that perhaps gravity in socalled mainstream “Standard-Model”-physics may be near to UNSOLVABLE, at least if put in the context of astrophysical COSMOLOGY.

---xxx---

4. The SECOND importance of the Nikolai A, Kozyrev research is a NEW APPROACH to the question of ORIGIN of energy in STARS and of ENERGY-BALANCE within stars. Here he had the observation, that DOUBLE-STAR-SYSTEMS show the strange effect, that OVER TIME they become PHYSICALLY RATHER SIMILAR regardless which great were the physical DIFFERENCES at the outset of the system. The main point here may be, that Nikolai Kozyrev DID NOT TRY to engage in modifications of theories on GRAVITATIONAL WAVES, but that he developed a new measurement and understanding of TIME, handling her as some sort of „physical force“, but NOT as SKALAR, as Farrell (2009) in above cited book is saying explicitly. What Farrell is NOT TALKING about however, is, that we easily may agree, that normally, what is NO SKALAR, may be a VECTOR, but that IN CASES you have to think very hard, whether a skalar in OTHER mathematical or physical surroundings may become a VECTOR, so that skalar suddenly is something doublefaced, doubleheaded. (Don` t believe me, check it up for yourself in German Wikipedia⁶.) We may however say, that it seems, that in Russia they AVOIDED, at least at first, as COMMON GROUND for physics a RE-introduction of ETHER, we may guess out of ideological reasons, which however did not mean, that they in Russia were quite on the way to „ether“ nevertheless. We thus may verbalize: If we have an “ether-field” of the zero-point of the near-vacuum, we might try to understand time AND gravity both as some sort of RESULTANTS from this field, to which may be adopted a topology of TORUS-geometries whatever.

6 See article „Skalar“ in German Wikipedia URL [http://de.wikipedia.org/wiki/Skalar_\(Mathematik\)](http://de.wikipedia.org/wiki/Skalar_(Mathematik))

---xxx---

5. Even if we now from Farrell remarks and from Russian bibliographies around Kozyrev find, that somehow the entire research was headed to TORSION-fields and therefor to SPIN and ANGULUM MOMENTUM, it seems, that other keywords of today hyperphysics were not touched by Kozyrev research, at least not by Kozyrev himself, such as „vacuum“ or „zero point“ or „tetrahedral astrophysics“ as in Richard Hoagland for instance or ETHER. I nevertheless tend at moment to the following educated guess, what may be the general direction of development. We thus may say: there „is“ something „near to NOTHING“ in which occurs some sort of DISTURBANCE OF THE EQUILIBRIUM, from which originates quite a LOT of physical effects, that at first glance seem not to be connected, but are all together some sort of MECHANICS of the NEAR-TO-NOTHING to TRANSFORM into what appears as PHYSICAL WORLD of some degree of PERCEPTIBILITY and TANGIBILITY in whatever dimension or geometry or even multiplicity of extremely miniaturized Planck-spheres⁷ of recent discussions around a “holographic universe” (pixeled⁸ with extremely tiny of tiny “Planck spheres”), the latter so much extremely small, that they in some sense may be seen as some other type of „NEAR-TO-NOTHINGNESS“. From all this there seems to emerge an impression AS IF THERE SEEMS TO BE SOME DEGREE OF ILLUSION in the entire construction of „NEW THINGS OF THOUGHT“, which would lead to REEXAMINE PLATOS „parable of the cave“, let`s guess in the direction of some sort of „computerized simulation“ or even game, leading to the educated question, whether all the contemporary physics can be interpreted as some sort of NEAR TO REALISTIC GAME or HOLOGRAM. Well, Einsteinian physics suddenly seen as some sort of game-theory, that certainly should evoke response by all these today brilliant mathematicians, because this would mean a fundamental progress since the introduction of „Theory of Games and economic behavior“ by German-Hungarian John von Neumann⁹, for first time 1944.

Now I may hint to something, Farrell is NOT TALKING about, which is the following: If we have today all these STRANGE STATES of „matter“ as „optically rearranged monatomic elements“ (ORME) with MULTIPLE sorts of RADIOACTIVITIES and PROBABLY WIDE SPREAD „micro-nuclear-reactions“ in STYLE OF „ALCHEMICAL“ ELEMENT-TRANSFORMATIONS, and this may mean, that there might be an

7 We should keep in mind, that Christoph von Mettenheim already questioned the „strange procedure“ HOW the „Planck-Wirkungsquantum“ by Planck himself was PUT to CONSTANT. The problem is very similar to the „CONSTANT“ speed of light since Einstein or rather Poincare: You cannot introduce always NEW CONSTANT factors to BRIDGE the ABYSSES of your own PROBLEMATICAL theory-building!

8 I may hint at this junction to the possibility of pixeling the universe by using the 9-square and 8-square of the so-called „method of squaring the circle“ as presented in Pharaonic papyrus Rhind of appr. 1800 BC, which would AVOID the NEW problems of an UNCERTAIN CONSTANT Planck „Wirkungsquantum“, as placed by Christoph von Mettenheim and which would LINK to “musical features of global scaling” using the scale of equidistant distributed error of 12th root of 2 from division of a monochord string – and perhaps even to the 81 “natural” elements in the “table of elements”, at least if applying a more “considerate” new and revised method of COUNTING and labeling, as for instance in surroundings of Peter Plichta.

9 See Neumann, John/Morgenstern, O.: Theory of Games and Economic behavior“ Princeton 1947

OSCILLATION between APPEARANCE and VANISHING at VERY HIGH SPEED, that again is producing an ILLUSION, which is the illusion of DURATION of a STABLE somehow MATERIAL WORLD. It is felt strange to me, that especially Farrell and lots of others escaped the possibility, that IF we have the term „illusion“ AS IN OLD INDIAN PHILOSOPHIES, we might find in those Indian philosophies concepts of „conditioned duration“ or „conditioned stability“, which both are ILLUSIONS in „essence“ but making the „world going round“, so that this world and universe may become LEVELS OF EXISTENCE for PURE SPIRIT, for to become simply ENGAGED IN for the purpose of development whatever or any other unknown purpose, even if this would include „illusionary“ BIRTH and „illusionary“ DEATH. The problem in putting the words such figuratively however is, that whatever illusionary this world may be or may become in today advanced physics, sorrow, pain and sufferings may set IRREVOCABLE and UNFORGETTABLE MARKS to and in spirits experiencing such „illusionary“ existence. Which I add here, so that we may avoid “elegant nonsense”¹⁰!

It perhaps is necessary to remember, that in lifetimes of Kozyrev certain keywords that are ruling the today discussions simply were not possible at all, because they were not even conceived. So, beware of getting drunk by all the awful lot of Farrell-stuff on contemporary physics, in which some of above keywords are missing as well.

---xxx---

6. I may comment on “TORSION-fields” in some more detail, because this keyword will appear in the bibliographical list more often: If we have “torsion”, we have “spin” and even “vortex” and “spirals”, “torus-geometries”, “inverted Schauburger funnels” (as some sort of “mathematical functions” linkable with “torus-geometries”) et cetera.

If I am allowed, to add here: In Farrell (2008), Secrets of the Unified Field, we even have a chapter titled: >> The “Swastika Tensor”, Or, “How Einstein`s Torsion Tensor May have Found a Home in the Waffen SS”<<¹¹. Well, whatever the NAZIS saw in the “Swastika”, we perhaps better remember, that the NAZI-Swastika has a DOUBLE WITH OTHER SPIN, that secondly it was taken from especially INDIAN traditions, if not the Vedas, and such may hint to the POOR RESTS of a hypothetical “very high predecessor-civilization”, the hypothesized SUPERIOR – of course: “superior”! - knowledge of which, as would be my humble objection, PERHAPS to NOT ANYBODY LIVING OF THIS, OUR PRESENT MANKIND, was disclosed so far more distinct than possible within the sad humdrum of “nebulous mists of the millennia” before us! And if we happen to navigate those vague mists of traditions whatever, we perhaps better should expect, that the REAL thing about a “sunlight-physics” - even “operable by normal man”, may be even with components of “plasma similar states of matter” - normally would not be revealed to strangers, especially not to Westeuropean foreigners with proven inclination to business only and therefor lack of proper metaphysical “mentality”, if not training! Or in other words: If someone would

¹⁰ See Sokal, Alan/Bricmont, Jean: Eleganter Unsinn. Wie die Denker der Postmoderne die Wissenschaften mißbrauchen, München: C.H. Beck 1999 – original French?

¹¹ Farrell, Joseph P.: Secrets of the Unified field, Kempton/Illinois: Adventures Unlimited 2008, part Three, 11 “the Swastika Tensor, Or, “how Einstein`s Torsion Tensor >May have Found a Home in the Waffen SS”, p. 262-266

like to try a “race for hidden knowledge”, better think before, that such undertaking may not end like the story of the “tower of Babel” in Old Testament first!

So I would rather recommend, to expect, that “torsion” in Kozyrev - terminology will have a special twist in meaning

There is something else with “torsion”, which is, that Farrell (2008), *Secrets of the Unified Field*¹², and Farrell ((2008), *NAZI International*¹³, are linking directly the Kozyrev research on torsion and stars with the NAZI project “bell” or “beehive”, not because there was a link in real history, but BECAUSE Farrell is searching for RATIONALS to form an interpretation of NAZI-experiments like the “NAZI-bell”, otherwise not quite comprehensible. This is far from joking: In 1952 it was closed the HUEMUL-site in Peron-Argentina (region of Bariloche, today known as holiday destination), where a certain NAZI-scientist “Dr. Ronald Richter”¹⁴ made experiments, that were NOT REALLY UNDERSTOOD by official Argentine commissions nor by a consultant professor from the Netherlands, Prof. Cornelius Jan Bakker. Discussions indeed were centered around claims, that Richter had found a “new physical principle” directed to “fusion-physics”, which however, so far I know, would need some knowledge of “plasma-physics”, which but appeared as “theory of some cohesion” in the 1980ties only. It seemed, that somehow EXISTING THEORIES did not deliver sufficient explanations and that especially the TECHNICAL EQUIPMENT AND APPARATUS of Dr. Ronald Richter, that was found and even photographed, seemed to have no proper links to claimed experiments, even not to plausibility tests. In short: Reading Farrell on this topic gives the suspicion, that Dr. Ronald Richter was busy with a CONTINUATION of the original “NAZI-bell-experiment”, which might even have popped up again in the so-called Kecksburg¹⁵/Pennsylvania, UFO-incident of 1965, that perhaps was not really “genuine alien”, but may have been an unforeseen side effect of the NAZI-bell, say some sort of “teleportation” with bad navigation!

This is strange and IMPORTANT: It seems, that Einsteinian physics NOR forced NAZI-experiments could deliver any REAL EXPLANATION for the PHENOMENONS produced by the “bell-machine” with counter-clockwise cylinders at its core, demanding capacities for energy-supply in range of those normally sufficient for a small town and resulting in constructions and buildings for the experiment in range of a real industrial complex of facilities, which all discovered more recently Igor Witkowski¹⁶ in the tunneled mountains of

Slaskia, which are geographically rather near the SKODA-works in BRNO/Brünn just on the other side of the frontier in former Czechoslovakia, which under command of “SS-Kammlerstab” became entirely some sort of “Area 51” of the NAZIS, which was a really HUGE SCIENTIFIC-INDUSTRIAL-MILITARY COMPLEX to feed war. So in the end, it may appear, that we have a “handling” of torsion by Kozyrev with regard to OBSERVATION and UNDERSTANDING PHYSICAL FEATURES of STARS in a VERY new way leading to new KOZYREV-APPARATUS (like special gyroscopes), may be WITHOUT focus on MATHEMATICAL DESCRIPTION BY TOPOLOGIES, may be even without hints to “tetrahedral astrophysics” of Richard Hoagland¹⁷, which I have seen applied to the great rectangular feature on the Uranus-moon MIRANDA near to convincingly. From this we now can DISTINGUISH by making CLEAR DISTINCTIONS, that the NAZI-handling of torsion was QUITE other, which was a ENGINEERING of the UNKNOWN by TRIAL AND ERROR in search for WEAPONIZATIONS, which was CONTINUED after World War II. and very probably may have DANGEROUS SIDE-EFFECTS, which may be part of the biography of (hardcore) NAZI-physicist Burkhard Heim¹⁸, who until today is estimated in certain circles, although I would not make a bed on his proposals for some sort of a “6-dimensional universe”, simply because we at moment have REALLY LOTS of “interesting” and “promising” TRIALS FOR COSMOLOGY, which of course CANNOT BE ALL viable!

---xxx---

7. With this said I now may go on to little bit reflecting on more technical aspects of this bibliographical compilation.

7.1 There first is the problem of SIMILAR names, so that in cases of doubt the above bibliographical information is crucial to separate the ASTRONOMER and

Die wissenschaftliche Erforschung und praktische Nutzung übersinnlicher Kräfte des Geistes und der Seele im Ostblock, Bern, München, Wien: Scherz 1972; amerik. u.d.T.: Psychic Discoveries behind the Iron Curtain, London; Abacus / Little, Brown 1976, new ed.; hier zitiert nach Lizenzausgabe für Gütersloh: Bertelsmann, Mohn s.a., S.406 (very few title entries)

did not become clear beyond doubt to this author, whether JPRS is stockpiled in meantime in parts in Harvard University Library, where it is announced, that until 2016 materials will become more fully available there, or whether JPRS is managed in such way, that some privileged US universities are given the technologies to operate JPRS materials in the ways of a librarian with mainly search and lend functions. However, Harvard University Library under JPRS search²⁴ in at moment did not return any hits for keyword „Kozyrev“ in whatever spelling or alphabet.

Otherwise the possible reader may experience limited access and other restrictions from compartmentarization of knowledge policies out of reasons of US-American understanding of so-called „National Security“, „Cultural Heritage“ and “freedom of science” as part of U.S. full-scale dominance, which may be felt little bit narrowed, at least if coming from continental European contexts. It is my personal impression, that it might have occurred in meantime, that the differences in scientific approach between the U.S. and Russia are not only something like a difference in „scientific dialect“, but rather more the beginning of „psychophysics“ or a „spiritual physics“ in Russia, whereas the situation among Princeton physicists since Ruyer, Raimond²⁵ have been described as the revival of some sort of GNOSTICISM – to which I from my reading experience would add a “hermetic touch” coming from Greek sorcery papyri dealing with “Hermes Trismegistos” and the “tabula smaragdina”! - , with which we should be really happy, were there not in the U.S. the INFILTRATION OF SCIENCE by antagonistic parties of UNDERGROUND-NAZIS and HARDCORE-FREEMASONS, as described in Hoagland, Richard/Bara, Mike²⁶.

If this situation felt SHOCKING or ANNOYING to the normal student, we may softly interject: It seems, that there have been LITTLE CHANGINGS only since the OPERATION GUIDELINES in the Library of Heliopolis (Pharaonic standard name: “House of life”) and the Library of Alexandria – and IF so, we may say, that the REAL “problem” may be, that they always forget to INFORM the last pupil from remote rural villages, to which it was not promoted the proverbial TIBETAN saying, that “this planet IS hell”, whatever young boys and girls may dream up an IDEALISTIC world of fairy tales, in which KNOWLEDGE is granted FREE to EVERYBODY according to TRUE NEEDS! RESTRICTIONS, by the way, normally just BEGIN with PRICES to be paid for scientific publications, so that Buike Science And MUSIC decided, the barrier of HEAVY PRICING for to get Buike works to be LIFTED to WHOMEVER on this marvelous “blue globe” by applying the method of “open access”!

8. As final topic here: If users feel annoyed about differences in bibliographical standards, imagine please, what the compiler had been annoyed before!

---xxx---

9. Although I had no special dedication in mind, this little survey very well may be understood as encouragement and support for Jakub`s „gang of engineers“ from Warsaw Technical University spread throughout Europe in meantime and striving for excellence of some sort.
